

I believe that calls from radio and TV stations asking to watch a show or listen to a station are advertisements, and indeed are "solicitations" - they are soliciting my business! I do not wish to receive these phonecalls at my house. I have tried and tried to reduce the number of telemarketing calls and mail, and yet they still come. Please do not make it worse. If I want to watch a TV show or listen to a radio station, I will, but I do not need to be harrassed to do so. This is ultimately what will happen - they will start calling at annoying times, such as dinner or at night, because that is when most people are home. Stand up for the average person, not the big TV and radio conglomerates.
